Experienced web developer with a strong foundation in front-end development and a passion for building scalable, user-centric applications. Looking to join a forward-thinking team where I can contribute to high-impact projects and drive technical excellence.

Experience

Otomashen IT Services Pvt. Ltd. Front-end Developer

DEC 2024 - Present

- Designed and implemented scalable Role-Based Access Control (RBAC) architecture supporting hierarchical roles such as Super Admin, Admin, and Business Unit Admin (BUAdmin), each with tailored access permissions.
- Enabled custom role creation with modular permission mapping, allowing access control across core modules like Jobs, Candidates, and Clients.
- Implemented an AI-based job-candidate matching engine, displaying fit scores to highlight the most suitable candidates for jobs and vice versa.
- Integrated dynamic dashboard rendering and redirection logic based on assigned user roles using React Router and nested routing.
- Built a modular routing structure using nested routes to simplify access and deep-linking to submodules like Job Details, Candidate Profiles, and Clients Listing.
- Ensured seamless navigation experience and restricted unauthorized access at both route and component levels.

Technologies: HTML5, CSS3, Tailwind, JavaScript, React.js, Formik, Material UI and Redux Toolkit.

Otomashen IT Services Pvt. Ltd. Full-Stack Intern

JUN 2024 - NOV 2024

- Developed and enhanced dashboards for an Applicant Tracking System (ATS) platform, with a primary focus on front-end development after initially contributing to back-end work.
- Gained hands-on experience with Material UI, Redux Toolkit, and the Django Framework, contributing to both front-end and back-end development.
- Implemented key features and integrated APIs, significantly improving the platform's user experience and functionality.

Projects

Knowledge.all (Ongoing)

- Knowledge.all with role-based dashboards for Students, Teachers, and Admins.
- Developed Student dashboard for accessing courses and practice modules, and Teacher dashboard for course creation & management.
- Implemented JWT authentication and role-based authorization to ensure secure and personalized user access. (<https://knowledge-all-kn0s.onrender.com/>)

Technologies: HTML5, CSS3, Tailwind, React, Formik, Redux Toolkit, Material UI, Node, Express, MongoDB

Portfolio

- Developed a personal portfolio website to showcase projects, skills, and professional experience.
- Designed with a modern responsive layout to ensure compatibility across various devices and screen sizes. (<http://devendraportfolio.onrender.com/>)

Technologies: HTML5, CSS3, Tailwind, JavaScript, React.js.

GetHome

- Contributed to developing a web application for home rentals, enhancing user experience.
- Implemented features that allowed users to search for PGs and Flats across various locations.
- Collaborated with team to integrate front-end components with backend functionality. (<https://github.com/Devendrkr19>)

Technologies: HTML5, CSS3, SCSS, React.js, Node.js, Express.js, MongoDB.
